

TABLES COULD TURN QUICKLY IN ALEC BALDWIN SAGA

LOS ANGELES (Wireless Flash) – Alec Baldwin's daddy troubles may be over sooner than expected, but Kim Bassinger's woes could be just beginning.

That's according to family law expert, Stacy Phillips, who says although Baldwin is in a heap of trouble for leaving an angry tirade on his 11-year-old daughter's voicemail, Bassinger may also end up in hot water – if certain evidence surfaces in the court hearing this Friday (May 4).

For example, if it's found that Bassinger leaked the tape of her estranged husband's message to the media, that could spell big trouble for the sexy star.

Says Phillips: "If Kim leaked the tape it'll look horrible on her part and the tables could turn on her. It will look like she just added fuel to an already nasty relationship between her and Alec and she could even lose custody of her daughter, Ireland."

And while Phillips is confident the judge will still be harsh on Baldwin, she believes he will continue getting visitation rights despite belittling his daughter.

Phillips adds, "This one documented incident won't ruin his rights as a father but he does need to get some long-term therapeutic help managing his anger so a similar incident doesn't occur again."
